This worksheet designed to allow you to enter and keep track of home-office expense. As an Owner-Operator Trucker both the CRA and the IRS allows you to write off a percentage of the cost of utilizing space in your home for business. Keeping track of this information will allow your Bookkeeper or accountant to easily allocate the write-off amounts. Currently the system defaults to 25%. All of the expense columns are self explained. Just enter your expense and the system will do the allocation.
